Select here the ideal product for your need:

1 Varnishes

Outdoor and Indoor

To give a high gloss or satin finish, resulting a film of finishing, select one of our VARNISHES. There are several options for different needs: transparent or tinted, that beautify and protect the wood surface.

2 Impregnating Stains

Outdoor and Indoor

If you want a satin finish, which enhances the wood grain without forming a film on its surface, choose the Polisten line products. The impregnating stains penetrate the wood protecting it with your insecticide, fungicide action and water repellent. Besides that, they are easy to maintain.

3 Enamels

Outdoor and Indoor

If you want to paint the wood surface, covering all its grain, choose one of our ENAMELS available in various colors and finishes (high gloss, satin or mat) to color and protect the wood.

4 Complement

Here are the products that you have indicated to prepare the wood surface before receiving the finishing and also for the dilution of paints and varnishes, if necessary.

Varnishes

SB 2300 00 (high gloss)
S0 2301 00 (satin)

Sayermar
SB95 2300 00 (high gloss)
